

The Know Book

15th Edition

The Know Book | 2017

Good Samaritan Ministries was started in 1969 by individuals coming together to meet the needs of the community. Today, we continue that legacy by collaborating with businesses, local government, faith-based organizations, and other non-profits. We know that everyone has something to contribute and that community decisions are better made together. That is why we leverage community resources and expertise to provide the most effective response to specific needs.

The Know Book is one tool for connection and collaboration that our partners can use to best serve our community.

Thank you for the work you do. Together, we can build a healthy, engaged, and compassionate community!

About Good Samaritan Ministries

Lasting change happens when we empower people to work their way out of poverty. At Good Samaritan Ministries, we are learners who study the causes of poverty and its effects on individuals, families, and community.

We use that knowledge to continually innovate new ways to accomplish our mission to find solutions to poverty.

We base our tactics on our own history of success and on national best practices, brought locally and customized for our community.

See the Good Sam entry on page 27 for details about our programming.

These families would not have been able to secure a conventional mortgage and they would likely still be living in the cycle of poverty. Through new home builds, home restoration, and vital home repairs, Lakeshore Habitat for Humanity utilizes the Habitat model to create sustainable neighborhood and community impact.

The Lakeshore Habitat ReStore sells new and used home supplies to the general public. It accepts donations of new and used materials. Income from the store's operations support the ministry's goals.

Homeowner partners are required to complete 250 - 500 hours of sweat-equity (work) on their home or other Habitat projects and save for closing costs (approximately \$1,200). From birth to the first day of school, Ready for School connects parents to the resources and services they need to be successful as their child's first teacher.

- Enhance existing programming by engaging current pre-school and daycare providers in the Ready for School movement through opportunities for professional development and access to effective research based teaching methods and learning tools.
- Expand early learning opportunities by ensuring facility and programming space for every child and removing barriers that may discourage participation like cost and inconvenient hours of operations and transportation.
- Ready for School can assist parents and early childhood professionals in linking up resources in the Holland/Zeeland/Hamilton communities for children 0-5 years old. Examples of these resources are playgroups, healthcare support, tuition assistance for preschool, training for early childhood professionals, and scholarships for childcare providers to improve credentials.
